SEAL FISHERY.

The prosecution of the seal fishery of the coast of Newfoundland involves more danger and hardships than is generally known. About three weeks after leaving port the seals are "struck," and are frequently found in such numbers as to blacken the ice for miles around. The seal hunters leave the vessel either in punts or directly jumping on the ice, according to the ship's position. Their dress usually consists of a heavy "Guernsey frock," flat peaked caps, sou'westers, heavy pilot-cloth trousers, and oil-cloth overalls stuffed into long sea boots. Their arms are a sculping knife and a long pole with a gaff at the end called a "bat." The seal is easily dispatched by a single blow of this rude weapon on the skull. With the sculping knife the glistening, oil laden pelt is removed from the carcase which is left on the ice. The cry of the seal when approached by its human enemy is most piteous, and bluff and hardy hunters have often been known to hesitate before wielding the fatal blow, especially if the pleading seal is guarding its young. In that fickle Arctic atmosphere, and when the body of the seals is a long distance from the vessel, the hunters are often benighted when storms arise and open a channel in the ice that separates them from their craft. Sometimes the vessel has to bear away for safety, and many of the crew perish from cold and hunger unless luckily picked up by some other vessel. At other times, when the ice grows weak, they remain for hours together immersed to the knees or perhaps to the middle of the body, on frail cakes of ice. If they should survive this dreadful torture and be rescued, the evil of frost burn awaits them, and at the close of the homeward trip, their limbs are at the mercy of the surgeon's knife.

An Esquimaux House.

One would think that, cold and dreadful as the Arctic regions are known to be, the inhabitants would need every comfort that could be imagined in the way of a house. But no. The first thing the Esquimaux does in his home-building is to clear away the snow and ice from a spot of ground of the right size for his house. This he makes as smooth as he can, leaving one end a little higher than the other. The higher end is to serve as parlor and bedroom; the lower as work shop and kitchen. Around this cleared spot of earth blocks of hard frozen snow are laid in such a fashion that they form a low round roof, resembling in shape the half of a hollow ball. By way of a window, a small square of rather thin and clear ice is set into the wall.

On the side of the house least exposed to winter is a long and very low passage-way leading to the open air. This passage is so low that the inmates of the house have to crawl through it on their hands and knees. The door is only a loose block of snow.

These huts do not appear to be very charming residences, but there are two good things about them. One is, that the high winds of that desolate region cannot possibly blow a hut over, though they may bury it in snow; the other good thing is that no one hut can be lived in longer than a season. The poor Esquimaux are, unfortunately, a very dirty people and if they lived ever so long in one house they would never clean it. But the snowhouse finally cleans itself in the most thorough manner, for as soon as the warm days of summer comes it melts away, and its inmates must set about building a seal-skin tent that will shelter them till winter comes again.

The interior of China along the course of Yang-tse-Kiang is a land full of wonders. In one place piaciculture nurseries line the banks for nearly fifty miles. All sorts of inventions, the cotton gin included, claimed by Europeans and Americans, are to be found there forty centuries old. Plants, yielding drugs of great value, without number, the familiar tobacco and potato, maize, white and yellow corn, and other stalks believed to be indigenous to America, have been cultivated there from time immemorial.

The Providence (R. I.) Journal mentions a new way of paying old debts in Newport, where a tradesman recently failed for $2,100, offered to his creditors ten cents on the dollar, which was accepted, when he told them he could obtain the amount if they endorse his note to the bank. This they agreed to do, actually making themselves liable for the money they were receiving in full payment of the debts due them.

No man's spirits were ever hurt by doing his duty; on the contrary, one good action, one temptation resisted and overcome, no sacrifice of desire or interest, purely for conscience sake, will prove a cordial to weak and low spirits, far beyond what either indulgence, or diversion, or company can do for them.

What this country needs just at present is a sure and speedy process of killing the man who never thinks of shutting a door behind him.

The Dakota Valley City Times says: "Dakota wants women; would like to have them healthy, handsome and young, but any of passable quality are welcome."

Mrs. Partington notices that very few persons are suffering from congestion of the brain.

A Wrong Way.

The Republican County Central Committee on Saturday evening did that which has been condemned in other counties of this State, and which has occasioned more dissatisfaction in party circles than almost any other one thing, and that is taking upon itself the appointment of delegates to the State Convention. There can be no objection to the gentlemen selected, for they are all staunch Republicans and are among our best citizens, but the principle is wrong, and Justice Peterson was right in preferring a primary election to elect these delegates. If the Republicans of Mono county are in favor of Gen. Grant for President they should have the opportunity of sending a full Grant delegation to represent them in the State Convention; and the same with the Blaine, Sherman, or Washburne interest, which ever is in the majority. So far as the vote or influence of counties like Mono, having only one to three votes, is concerned it will amount to but little, as a county like Sacramento or San Francisco, which are strong for Blaine, swallow all the small counties. A primary election should have been called, and the delegates elected by the popular suffrage of the party, agreeably with what is known as the Crawford plan. The sending of a divided delegation counts naught.

Superior Judge.

We are indebted to Assemblyman Wasson for a copy of the following bill which he introduced:

SECTION 1. Within ten days after the passage of this Act, the Governor shall appoint an additional Judge of the Superior Court of the County of Mono, who shall qualify forthwith, and shall hold said office until the first Monday after the first day of January, A. D. eighteen hundred and eighty-one.

SEC. 2. The salary of said additional Judge shall be the same in amount, and shall be paid in the same manner as that of the Judge of the Superior Court of said county now authorized by law.

SEC. 3. One of the Judges of said Superior Court shall hold sessions of said Court at the town of Bodie, in the said county of Mono.

SEC. 4. It shall be the duty of the County Clerk of said county of Mono to keep an office at the said town of Bodie, at which all papers of said Superior Court may be filed and registered, and from which all process of said Superior Court may issue; and said Clerk is hereby directed to procure a duplicate seal of said Superior Court for the use of said office.

SEC. 5. It shall be the duty of Board of Supervisors of said County of Mono to provide a suitable Court-room for the holding of said Court at Bodie, together with jury-room, and the offices for the officers of the Court, and to audit and allow the expenses of said Court, as now provided by law.

SEC. 6. All mileage for service of process issuing out of said Court, held at Bodie and for attendance thereon, shall be estimated from and to said Town of Bodie.

SEC. 7. This Act shall be in force from and after its approval by the Governer.

SUMMIT.

Wm. Irwin, Sup't.

The north drift, 550 level, is in from the shaft 177 feet—progress since last report, 15 feet. The ledge in the face of the drift is 2 feet wide. The south drift has been extended during the past week 17 feet, making a total distance from the shaft of 196 feet. The ledge here is 3 feet wide. During the week connection was made between the upraise from the south drift, and the east crosscut from the 450 level of the Standard mine (incline) which gives better ventilation in prospecting this level.

BULWER CON.

Wm. Irwin, Sup't.

There has been no important change in the mine since last report. The drifts on the Ralston vein are looking about the same as usual. In the north drift which is in from the tunnel a distance of 135 feet, showing a progress for the week of 10 feet, the ledge is 2½ feet wide, and is looking well. The south drift has been extended since last report 12 feet, total length 131 feet. The ledge here is 3 feet wide of good ore. The ledge in the Stonewell stopes is 2 feet wide, of very good ore. In the stopes on the Ralston the ledge is 3½ feet wide and looks well.

DUDLEY.

W. P. Holmes, Supt.

In the main west crosscut, 500 foot level, have as yet been unable to get through the caved ground though during the past week considerable headway has been made. There has been some increase in the flow of water, and owing to the clayey and broken ground the face of the crosscut is simply a mass of slush; which runs like so much quicksand. This may last for a considerable distance, so the Superintendent has decided to come back in the crosscut some 15 feet, where the ground is firm, and work round the caved portion. This work is already well advanced and will soon reach the wet ground to the north of the crosscut.

DOUBLE STANDARD.

Wm. Irwin, Sup't.

The north drift is in from the crosscut 28 feet, having been run since last report 8 feet. The ledge here is 3½ feet wide, and looks well. The winze has been sunk during the week 17 feet, making a total depth of 35 feet. The ledge in the bottom is 3 feet wide, of good ore.

COAST.

Legislative.

SACRAMENTO, March 27.—The Senate took up the bill by Mr. Zuck, limiting devices of land to 640 acres to one person.

Mr. Nye moved the indefinite postponement of the bill.

Mr. Hittell spoke against the bill, and claimed it to be unconstitutional.

Mr. George moved to amend by limiting devices to 1260 acres of agricultural and 5120 acres of grazing land, which was accepted by Mr. Zuck, when Mr. George's amendment was adopted.

In the Assembly.

SACRAMENTO, March 27.—The educational bill was taken up and the entire morning session consumed in voting down amendments proposed by various members, none of which were of any importance. A committee amendment was offered to subdivision fifth of section 67, providing that bids for books to be sold should state the wholesale price at San Francisco. Several members opposed this amendment on the ground that it was in the interest of text book publishers in San Francisco and New York. The amendment was defeated by a vote of 38 to 35. The section was finally amended to read: "Said bids or proposals must be accompanied by sample copies of books proposed to be furnished together with a statement of the retail and wholesale price at which each book shall be sold within the county or at San Francisco."

Fire

BATTLE MOUNTAIN, March 27.—The freight depot and the Depot Hotel at this place were burned to-day.

For Blaine.

PORTLAND, Oregon, March 27.—The Republicans of Josephine county, in this State, in their County Convention, have instructed for Blaine. This is the first County Republican Convention held in Oregon, and undoubtedly indicates the sentiment of the State.

Killed.

PORTLAND, Oregon, March 27.—Joseph Marks, living at White Salem, Washington Territory, was accidently killed yesterday. While cutting a sapling the butt flew up and, striking him on the head, killed him instantly.

EASTERN.

New York Politics

NEW YORK, March 27.—The Tammany State Committee met in secret session yesterday afternoon. It was stated that the committe were awaiting the action of the Democratic State Committee, which was in session. Resolutions were passed, however, calling three delegates from every Assembly district to attend a convention, and giving the Executive Committee of the State Committee authority to name the time and place of holding the convention. Word was received from different Assembly districts stating that the organization was complete and satisfactory. It seemed to be the general feeling of the politicians present that they were in favor of the nominee of the convention, and opposed to Tilden. The country members, however, advised that the proceedings be deliberate and safe.

The Democratic State Committee met yesterday afternoon to fix the time and place for holding the State Convention. The form of the call was adopted, and the method of sending delegates to the State Convention, but the time and place were left for the present. The call sets forth that the object of the State Convention is to choose delegates to represent the State in the Democratic National Convention at Cincinnati. A substitute which had been offered for this was defeated. This substitute designated Utica as the place, and the 9th of June as the date. It also was declared that Democratic differences should be forgotten, in order that all might unite in a supreme effort to save Republic. It recommended that the Irving Hall organization and the Tammany Hall body should unite and elect delegates to the State Convention, and further recommend that no delegates be received from this city by the State Convention who should represent any organizations which refused to accede to the recommendation when any other organizations in that district should have shown itself ready to accede. A sub-committee of five was appointed to fill the blanks on the adopted calls, and a resolution was passed providing that the convention was to be called between the 20th of April and the 1st of May; and that twenty days should elapse between the issue of the call and the convention.

Charles R. Grannis, of Utica, one of the committee made an address in favor of Utica as the place for the convention. He understood that some of the delegates were afraid that Governor Seymour would endeavor to be placed in a position to control the convention if it were held there, but he could state that Governor Seymour would not be a candidate in any sense before the convention, and while Seymour did not feel disposed to give his views to newspaper interviewers who called on him, it was understood and known to the friends of that gentleman that under no circumstances would he consent to be a candidate before the National Convention. The committee adjourned sine die.

The sub-committee then went into session. Its members stated that no conclusion would be arrived at before to-day. It was stated on good authority that three members of the sub-committee favored Syracuse and two of them Utica; and that the reason the sub-committee was appointed was to forestall the Tammany State Committee from hiring a hall and engaging all the hotel accommodations in the place designated for the State Convention, as it had been stated that the Tammany body were going to hold a State Convention in the same place as the regular Democracy. It was said that Purcell and Boucher were the most prominent anti-Tilden men on the State Committee; that Starbuck was a strong Tilden man and the remainder of the committee were for the success of the Democratic party and were friendly to Mr. Tilden, but would vote for the best interests of the Democracy.

For Mormondom.

CALLESBURG, Ky., March 27.—Within the past ten days fully twenty converts to Mormonism have passed here on their way to Utah. They came from Lawrence county, Kentucky, where for years past Mormon missionaries have been laboring. One of the converts was a young and handsome married woman, who left her husband behind.

The Spinners.

TROY, N. Y., March 27.—The striking spinners of the Harmony Mills at Cohoes, were paid off to-day, the company retaining two weeks earnings of each man, under an agreement requiring two weeks notice of quitting work. The right to retain the money is to be tested in the courts. The strikers have been ordered to vacate the company's houses and have been refused meals at the company's boarding house.

Her Conduct.

CHICAGO, March 27.—The Inter Ocean's Washington special says: Reports from residents of Peru give accounts of Mrs. Christiancy's scandalous conduct, and say that her husband was obliged to send her away.

The Steamer Railroad Contract.

CHICAGO, March 27.—The Inter Ocean's Washington special says: The House Committee on Railroads will probably report favorably the resolution offered by Mr. Manning of Missis ippi, directing an investigation into the contract recently made between the Pacific Mail Steamship Company and the Pacific Railroads, under which competition in transportation between Asia and America is practically destroyed. The Judiciary Committee of the Senate is already charged with the duty of determining whether such contract is legal, and will probably report an opinion next week, but the House Railroad Committee propose to go into the facts and bring up before it the men who made the contract.

FOREIGN.

Corrupt Russians.

ST. PETERSBURG, March 27.—Serious defalcations have been discovered in the overland custom house, amounting to £150,000. The officials were detected in passing goods at low rate of duty. The Director of Customs and all his officials have been suspended pending an inquiry into the matter.

Over 100 students arrested on suspicion seven months ago have been released by the Government.

The Election.

EDENBURGH, March 27.—The contest here is waxing hot, but the Liberals will win and Gladstone will be returned. The impression here too, is that the Liberals will secure a majority in the general contest.

Land Talk.

PANAMA, March 27.—The Colombians are much excreised over the reports from Washington that the American Government will oppose the construction of the canal by a foreign company. They say they want no protectorate, neither French nor American, and will submit to neither without striking back as hard as they can. They are strongly incensed at the slight offered Colombia, in that she is not to be allowed the right to grant concessions to private companies other than Americans, or without asking permision of the United States.

REPUBLICAN CENTRAL COMMITTEE.—A meeting of the Republican Central Committee was held at Judge Peterson's office on Saturday evening. J. M. Dawley was appointed Chairman and C. W. Sullivan Secretary.

The following were present:

J. M. Dawley proxy for A. C. Richardson; C. W. Sullivan proxy for T. W. Elliott; R. Peterson proxy for G. W. Rowan; Paul W. Bennett proxy for D. L. Goodnow. Judge Peterson favored a primary election and made a motion to that effect, but there was no second to it. A motion of Mr. Bennett, to appoint three delegates, and that each of the prominent candidates shall be represented, was carried, and the following elected delegates to the State Convention to meet in Sacramento on April 29th: Dr. L. Goodnow on behalf of Blaine; C. W. Sullivan of behalf of Grant, and S. M. Pitcher on behalf of Washburne.

THE ROBINSON FAMILY.—The following letter, sent to this office by W. A. Searles, explains itself:

SAN FRANCISCO, March 20th, 1880.

I have this day received a call from W. A. Searles, Esq., who placed in my hands a draft on the Bank of California for the sum of $385 50, the net receipts of a concert given at Bodie on the 6th of March for the benefit of myself and little ones. Permit me to return my heartfelt thanks, not only to Mr. Searles for his more than human kindness, but to the Miners' Union for the free use of their Hall, to the press of Bodie, and also the people of Bodie, not forgetting the ladies and gentlemen who kindly volunteered their services, by their kind acts helping to dispel more than one cloud that has lately lowered over the heads of myself and little ones. Respectfully,

MRS. A. C. ROBINSON.

HOW LONG?—The action of the Republican Central Committee, on Saturday night makes out that Washburne is the third prominent candidate for Presidential honors, at the hands of the Chicago Convention. How long has he been such? We supposed that the three most prominent were Blaine, Grant and Sherman. In California, Sherman and Washburne have but few supporters, and our State Convention will elect a strong Blaine delegation to the Chicago Convention.

SICKENING.—The witticisms respecting the CHRONICLE which almost daily appear in the columns of our morning cotemporaries, are nauseating, and our friends are much mistaken if they suppose that such reading "matter" is interesting to the general reader. We do not intend to make the columns of this paper a channel of blackguardism.

A FIGHT.—About 11:30 on Saturday night a brisk fight was started in a saloon down town between two men, who were ejected from the saloon and finished their trouble on the sidewalk. No arrests were made.

ACCIDENTAL SHOT.—About 10:30 o'clock last evening Harry Beck was accidentally shot through his right hand, back of the little finger, making an ugly wound. The pistol was in his overcoat pocket, and he was probably fingering it from the outside.

NOTARY PUBLIC.—Frank Owen has been appointed Notary Public, to reside at Bodie.

OUR MINES.

The following are the weekly mining reports of the following companies:

STANDARD CON.
Wm. Irwin, Supt.

There has been no change of importance in the mine during the past week. The crosscut, 700 foot level, are making the usual progress, with no change in the character of the formation passed through. The shaft is still in hard blasting rock, with a slight increase in the flow of water. The east crosscut, 500 level, is in from the shaft 220 feet, having been advanced since last report 20 feet, in favorable porphyry formation. During the week started a crosscut west from the end of the north drift 500 level. This crosscut is now in 20 feet in good blasting ground. The east crosscut from the south drift, 385 foot level is in 33 feet, a progress for the week of 11 feet. Expect to cut the west Standard vein in this crosscut in a few days. Upraise No. 2 from the south drift has reached a height of 104 feet, having been advanced since last report 12 feet. The ledge here is 6 feet wide, of very rich ore. The upraise from the north drift is up 115 feet—a progress for the week, 15 feet. The ledge at this point is 4 feet wide of good milling ore. The north drift on the east ledge, 300 foot level, (Incline,) has been extended 11 feet, making a total distance of 232 feet. The ledge in the face of this drift is 3 feet wide and looks well. The south drift from the west crosscut is in 260 feet—progress since last report, 19 feet; the ledge here is five feet wide and looks well. The north drift, 550 foot level, has been advanced during the week 12 feet—total distance from the winze 132 feet. The stopes throughout the mine continue to look well, and are yielding the usual amount of good milling ore. In the north drift, 385 foot level, are now taking out very fine ore. The ledge in the West Standard stopes is six feet wide, and looks well. In the Gildea stopes, the vein is 4 feet wide of good ore.

BELVIDERE.
W. P. Holmes, Supt.

The main shaft is now down 35 feet below the 400 station. The east wall of the ledge has now a slight pitch to the west and carries on it about 2 feet of bright flinty quartz, which seems to improve in strength and character as the work progresses. Assays from this portion of the vein range from $15 to $37 per ton. Have also the west wall of the ledge in the west end of the shaft, standing nearly vertical, which is also carrying about 2 feet of quartz, of about the same value as that on the east wall. Between these two bodies of quartz there is about 3 feet of irregular seams of quartz and porphyry, assaying about 7 feet between walls. Work in other parts of the mine has been irregular, owing to the limited facilities for hoisting and on account of raising an ore chute on the ledge north of the shaft from the 400 foot level to the 350 foot level there is no change to report in south drift. The north drift, though somewhat broken, is still showing the usual amount of good ore. On the 300 foot level in the north drift passed, through a broken up and barren place in the ledge. The quartz, which had narrowed down to a few inches in width on the west wall has rapidly widened out to 2 feet in width, carrying some good ore with every prospect of still further improvement as the work advances. On this level have started a south drift on the ledge to intersect that portion of the ore chimney lying to the south of the shaft.

BOSTON CONSOLIDATED.
Martin Jones, Supt.

The main incline shaft has reached a depth of 78 feet below the 200 foot station, a progress for the week of 14 feet. The bottom of the shaft is now in harder ground and of the same favorable character referred to in last report. The north drift has been driven 101 feet north from the station. The progress for the past week has been 12 feet. The vein in this drift is now strong and regular, and carrying almost 2 ft. of good milling ore on east side of vein, with vein matter the full width of the drift, and no west wall in sight. The east wall has again become regular and has a heavy seam of clay next to the porphyry. At no time on the lead has the vein been so well defined.

BLACKHAWK.
S. B. Ferguson.

The shaft is down to the 700 level, with a 6-foot sump below. The station is in on both sides of the drift, and drifting was commenced to the east on Saturday, with an 8-hour shift, and to-day will commence on the drift to the west with a like shift. These drifts will be sent ahead as lively as possible, as the Colonel is anxious to see what he has ahead. Every thing about the mine is working smoothly.

MILL CREEK TELEGRAPH.—We learn that the California & Nevada Telegraph Co. intend running their line to Mill Creek this Spring. As they have nearly enough poles between here and that district, and can get the rest at Lundy, cheap, the cost of construction will be trifling.
